

INDEX TO VOLUME LIII

SUBJECTS

	PAGE
Abstracts, Preparation of	231
Algol, a Photo-Electric Study of. <i>Joel Stebbins</i>	105
R Aquarii, Observations of the Nebular Lines in the Spectrum of the Long-Period Variable Star. <i>Paul W. Merrill</i>	375
Arc, Pressure-Shifts in a Calcium. <i>L. F. Miller</i>	224
Bismuth Lines, Structure of the. <i>H. Nagaoka and Y. Sugiura</i>	339
Calcium Arc, Pressure-Shifts in a. <i>L. F. Miller</i>	224
RS Canum Venaticorum, Provisional Elements of the Eclipsing System. <i>Bancroft Walker Sitterly</i>	99
Carbon in Spectroscopy, Use of a Lime Cathode of. <i>Y. Sugiura and T. Matoba</i>	323
Carbon, Iron, and Nickel, Vacuum-Spark Spectra in the Extreme Ultra- Violet of. <i>R. A. Millikan, I. S. Bowen, and R. A. Sawyer</i>	150
SX Cassiopeiae, Elements of the Eclipsing System. <i>Mary Fowler</i>	165
Classification of Long-Period Variables, Geometrical. <i>J. G. Hagen</i>	179
Contributors, Notice to	168
65 τ Cygni, Orbit of the Short-Period Spectroscopic Binary. <i>J. S. Paras- kevopoulos</i>	144
X Cygni, Spectroscopic Orbit of the Cepheid Variable. <i>John C. Duncan</i>	95
Diameter of α Orionis with the Interferometer, Measurement of the. <i>A. A. Michelson and F. G. Pease</i>	249
Dispersion, to Account for the Change of Refractive Index with Tempera- ture, a Modification of the Electron Theory of. <i>G. Szivessy</i>	326
Electron Theory of Dispersion, to Account for the Change of Refractive Index with Temperature, a Modification of the. <i>G. Szivessy</i>	326
Grating and Interferometer Measures λ 3370- λ 6750, Wave-Lengths of Lines in the Iron Arc from. <i>Charles E. St. John and Harold D. Babcock</i>	260
Hydrogen Chloride, Absorption Spectrum of: <i>Walter F. Colby and Charles F. Meyer</i>	300
Images, Mutual Action of Adjacent Photographic. <i>Frank E. Ross</i>	349
Infra-Red Spectrum of the Sun λ 8900- λ 9900, Examination of the. <i>Frederick S. Brackets</i>	121
Interferometer, Measurement of the Diameter of α Orionis with the. <i>A. A. Michelson and F. G. Pease</i>	249
Interferometer Measures λ 3370- λ 6750, Wave-Lengths of Lines in the Iron Arc from Grating and. <i>Charles E. St. John and Harold D. Babcock</i>	260

	PAGE
Iron, and Nickel, Vacuum-Spark Spectra in the Extreme Ultra-Violet of Carbon. <i>R. A. Millikan, I. S. Bowen, and R. A. Sawyer</i> . . .	150
Iron Arc from Grating and Interferometer Measures λ 3370- λ 6750, Wave-Lengths of Lines in the. <i>Charles E. St. John and Harold D. Babcock</i> . . .	260
Lime Cathode of Carbon in Spectroscopy, Use of a. <i>Y. Sugiura and T. Matoba</i> . . .	323
Lines, Structure of the Bismuth. <i>H. Nagaoka and Y. Sugiura</i> . .	339
Lines in Spectra of Venus, Systematic Displacements of. <i>Charles E. St. John and Seth B. Nicholson</i> . . .	380
Lockyer, Sir Norman, 1836-1920. <i>A. L. Cortie, S.J.</i> . . .	233
Magnetic Separation, Measurement of Pole-Effect and Its Connection with. <i>H. Nagaoka</i> . . .	329
Manganese, Variation with Temperature of the Electric Furnace Spectrum of. <i>Arthur S. King</i> . . .	133
Motions, Radiation Pressure and Celestial. <i>Henry Norris Russell</i> . .	I
Nebula, On the Passage of a Star through a. <i>Ernest W. Brown.</i> . .	169
Nebulae near ζ Orionis Photographed with the 100-Inch Hooker Telescope, Bright and Dark. <i>John C. Duncan</i> . . .	392
Nebular Lines in the Spectrum of the Long-Period Variable Star R Aquarii, Observations of the. <i>Paul W. Merrill</i> . . .	375
Nickel, Vacuum-Spark Spectra in the Extreme Ultra-Violet of Carbon, Iron, and. <i>R. A. Millikan, I. S. Bowen, and R. A. Sawyer</i> . . .	150
Notice to Contributors . . .	168
Orbit of the Cepheid Variable X Cygni, Spectroscopic. <i>John C. Duncan</i> . .	95
Orbit of the Short-Period Spectroscopic Binary 65 τ Cygni. <i>J. S. Paraskévopoulos</i> . . .	144
Orbits of Seven Spectroscopic Binaries. <i>R. F. Sanford</i> . . .	201
Orion, Suspected Variable, Bond 624, in Trapezium of. <i>J. A. Parkhurst</i> . .	317
α Orionis with the Interferometer, Measurement of the Diameter of. <i>A. A. Michelson and F. G. Pease</i> . . .	249
ζ Orionis Photographed with the 100-Inch Hooker Telescope, Bright and Dark Nebulae near. <i>John C. Duncan</i> . . .	392
Parallaxes of 1646 Stars Derived by the Spectroscopic Method. <i>W. S. Adams, A. H. Joy, G. Strömberg, and Cora G. Burwell</i> . . .	13
Photo-Electric Study of Algol. <i>Joel Stebbins</i> . . .	105
Photographic Images, Mutual Action of Adjacent. <i>Frank E. Ross</i> . .	349
Pole-Effect and Its Connection with Magnetic Separation, Measurement of. <i>H. Nagaoka</i> . . .	329
Pressure and Celestial Motions, Radiation. <i>Henry Norris Russell</i> . .	I
Pressure in the Atmospheres of the Stars. <i>P. Salet</i> . . .	327
Pressure-Shifts in a Calcium Arc. <i>L. F. Miller</i> . . .	224
Prominence of October 8, 1920, Exceptionally High Solar. <i>Oliver J. Lee</i> . .	310
Radiation Pressure and Celestial Motions. <i>Henry Norris Russell</i> . .	I

	PAGE
Refractive Index with Temperature, a Modification of the Electron Theory of Dispersion, to Account for the Change of. <i>G. Szivessy</i> .	326
Solar Prominence of October 8, 1920, Exceptionally High. <i>Oliver J. Lee</i>	310
Spectra, Intensity Differences in Furnace and Arc among the Component Series in Band. <i>Arthur S. King</i>	161
Spectra in the Extreme Ultra-Violet of Carbon, Iron, and Nickel, Vacuum-Spark. <i>R. A. Millikan, I. S. Bowen, and R. A. Sawyer</i>	150
Spectra of Class Md, Characteristic Behavior of the Bright Lines in Stellar. <i>Paul W. Merrill</i>	185
Spectra of Venus, Systematic Displacements of Lines in. <i>Charles E. St. John and Seth B. Nicholson</i>	380
Spectroscopic Binaries, Orbits of Seven. <i>R. F. Sanford</i>	201
Spectroscopic Binary 65 τ Cygni, Orbit of the Short-Period. <i>J. S. Paraskévopoulos</i>	144
Spectroscopy, Use of a Lime Cathode of Carbon in. <i>Y. Sugiura and T. Matoba</i>	323
Spectrum of Hydrogen Chloride, Absorption. <i>Walter F. Colby and Charles F. Meyer</i>	300
Spectrum of Manganese, Variation with Temperature of the Electric Furnace. <i>Arthur S. King</i>	133
Spectrum of the Long-Period Variable Star R Aquarii, Observations of the Nebular Lines in the. <i>Paul W. Merrill</i>	375
Spectrum of the Sun, λ 8900- λ 9900, Examination of the Infra-Red. <i>Frederick S. Brackett</i>	121
Star through a Nebula, On the Passage of a. <i>Ernest W. Brown</i>	169
Stars, Pressure in the Atmospheres of the. <i>P. Salet</i>	327
Sun, λ 8900- λ 9900, Examination of the Infra-Red Spectrum of the. <i>Frederick S. Brackett</i>	121
Temperature, a Modification of the Electron Theory of Dispersion, to Account for the Change of Refractive Index with. <i>G. Szivessy</i> . .	326
Temperature of the Electric Furnace Spectrum of Manganese, Variation with. <i>Arthur S. King</i>	133
Ultra-Violet of Carbon, Iron, and Nickel, Vacuum-Spark Spectra in the Extreme. <i>R. A. Millikan, I. S. Bowen, and R. A. Sawyer</i>	150
Variable, Bond 624, in Trapezium of Orion, Suspected. <i>J. A. Parkhurst</i>	317
Variable Star R Aquarii, Observations of the Nebular Lines in the Spectrum of the Long-Period. <i>Paul W. Merrill</i>	375
Variable X Cygni, Spectroscopic Orbit of the Cepheid. <i>John C. Duncan</i>	95
Variables, Geometrical Classification of Long-Period. <i>J. G. Hagen</i> .	179
Venus, Systematic Displacements of Lines in Spectra of. <i>Charles E. St. John and Seth B. Nicholson</i>	380
Wave-Lengths of Lines in the Iron Arc from Grating and Interferometer Measures λ 3370- λ 6750. <i>Charles E. St. John and Harold D. Babcock</i>	260

INDEX TO VOLUME LIII

AUTHORS

	PAGE
ADAMS, W. S., A. H. JOY, G. STRÖMBERG, and CORA G. BURWELL. Parallaxes of 1646 Stars Derived by the Spectroscopic Method . . .	13
BABCOCK, HAROLD D., and CHARLES E. ST. JOHN. Wave-Lengths of Lines in the Iron Arc from Grating and Interferometer Measures λ 3370- λ 6750	260
BOWEN, I. S., R. A. SAWYER, and R. A. MILLIKAN. Vacuum-Spark Spectra in the Extreme Ultra-Violet of Carbon, Iron, and Nickel . . .	150
BRACKETT, FREDERICK S. Examination of the Infra-Red Spectrum of the Sun, λ 8900- λ 9900	121
BROWN, ERNEST W. On the Passage of a Star through a Nebula . . .	169
BURWELL, CORA G., W. S. ADAMS, A. H. JOY, and G. STRÖMBERG. Parallaxes of 1646 Stars Derived by the Spectroscopic Method . . .	13
COLBY, WALTER F., and CHARLES F. MEYER. On the Absorption Spectrum of Hydrogen Chloride.	300
CORTIE, A. L., S.J. Sir Norman Lockyer, 1836-1920	233
DUNCAN, JOHN C. Bright and Dark Nebulae near ζ Orionis Photo- graphed with the 100-Inch Hooker Telescope	392
Spectroscopic Orbit of the Cepheid Variable X Cygni	95
FOWLER, MARY. Elements of the Eclipsing System SX Cassiopeiae . .	165
HAGEN, J. G. On the Geometrical Classification of Long-Period Variables	179
JOY, A. H., G. STRÖMBERG, CORA G. BURWELL, and W. S. ADAMS. Parallaxes of 1646 Stars Derived by the Spectroscopic Method . . .	13
KING, ARTHUR S. Intensity Differences in Furnace and Arc among the Component Series in Band Spectra	161
The Variation with Temperature of the Electric Furnace Spectrum of Manganese	133
LEE, OLIVER J. Exceptionally High Solar Prominence of October 8, 1920	310
MATOKA, T., and Y. SUGIURA. Use of a Lime Cathode of Carbon in Spectroscopy	323
MERRILL, PAUL W. Characteristic Behavior of the Bright Lines in Stellar Spectra of Class Md	185
Observations of the Nebular Lines in the Spectrum of the Long-Period Variable Star R Aquarii	375
MEYER, CHARLES F., and WALTER F. COLBY. On the Absorption Spectrum of Hydrogen Chloride	300

INDEX TO AUTHORS

	PAGE
MICHELSON, A. A., and F. G. PEASE. Measurement of the Diameter of α Orionis with the Interferometer	249
MILLER, L. F. Pressure-Shifts in a Calcium Arc	224
MILLIKAN, R. A., I. S. BOWEN, and R. A. SAWYER. Vacuum-Spark Spectra in the Extreme Ultra-Violet of Carbon, Iron, and Nickel	150
NAGAOKA, H. On the Measurement of Pole-Effect and Its Connection with Magnetic Separation	329
NAGAOKA, H., and Y. SUGIURA. Structure of the Bismuth Lines	339
NICHOLSON, SETH B., and CHARLES E. ST. JOHN. Systematic Displacements of Lines in Spectra of Venus	380
PARASKÉVOPOULOS, J. S. Orbit of the Short-Period Spectroscopic Binary 65 τ Cygni	144
PARKHURST, J. A. Suspected Variable, Bond 624, in Trapezium of Orion	317
PEASE, F. G., and A. A. MICHELSON. Measurement of the Diameter of α Orionis with the Interferometer	249
ROSS, FRANK E. Mutual Action of Adjacent Photographic Images	349
RUSSELL, HENRY NORRIS. Radiation Pressure and Celestial Motions	1
ST. JOHN, CHARLES E., and HAROLD D. BABCOCK. Wave-Lengths of Lines in the Iron Arc from Grating and Interferometer Measures λ 3370- λ 6750	260
ST. JOHN, CHARLES E., and SETH B. NICHOLSON. Systematic Displacements of Lines in Spectra of Venus	380
SALET, P. On the Pressure in the Atmospheres of the Stars	327
SANFORD, R. F. Orbits of Seven Spectroscopic Binaries	201
SAWYER, R. A., R. A. MILLIKAN, and I. S. BOWEN. Vacuum-Spark Spectra in the Extreme Ultra-Violet of Carbon, Iron and Nickel	150
SITTERLY, BANCROFT WALKER. Provisional Elements of the Eclipsing System RS Canum Venaticorum	99
STEBBINS, JOEL. A Photo-Electric Study of Algol	105
STRÖMBERG, G., CORA G. BURWELL, W. S. ADAMS, and A. H. JOY. Parallaxes of 1646 Stars Derived by the Spectroscopic Method	13
SUGIURA, Y., and T. MATOBA. Use of a Lime Cathode of Carbon in Spectroscopy	323
SUGIURA, Y., and H. NAGAOKA. Structure of the Bismuth Lines	339
SZIVESSY, G. A Modification of the Electron Theory of Dispersion, to Account for the Change of Refractive Index with Temperature	326
